neo CAP SERIES

New powder type water conditioner

Neo Cap series is a powder type water conditioner,
not a liquid, so it is very convenient to use.

Performs multi-function

In the case of liquid products, when several ingredients are mixed, the ingredients are transformed completely differently by chemical reaction

Powder type water conditioner effectively performs multi-function in one product because there is no chemical reaction between various components.

Convenient capsule packaging

It's also an innovative product that doesn't have to be overused
because it's packaged in capsules for one-time use.

Contain most efficient and safe organic carbon

For the survival and reproduction of most beneficial bacteria, organic carbon, nitrogenic compounds, phosphate, and trace elements are all needed. In particular, organic carbon (the basic energy source) is needed the most among them, but in tank there is always less organic carbon and excess nitrogenic compounds such as ammonia, nitrate and phosphate.

As soon as organic carbon is supplied, for the survival and reproduction, most beneficial bacteria use it as an energy source to consume (=remove) and decompose phosphate and nitrogen compounds (ammonia, nitrites, nitrate) and other pollutants.

The Neo Cap series contains the most efficient and safe organic carbon used in Neo Water Conditioners.

Safety caps

Safety caps have been adopted to prevent accidents caused by children.
To open the bottle, you have to push down the lid to the end, and then turn it to the left.

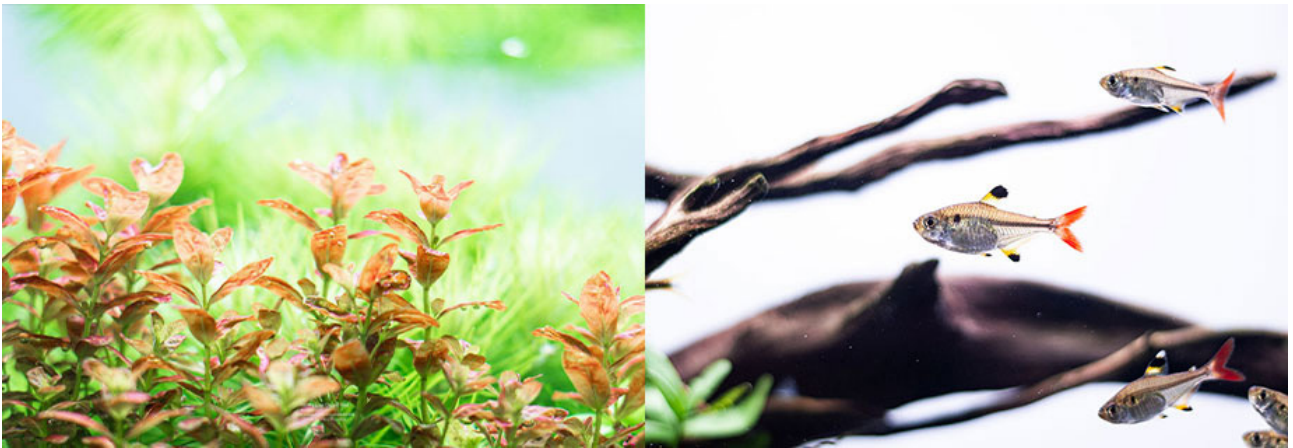

Product Features Summary

	organic carbon	Powder Bacteria	Perfect nutrition for bacteria	Remove chlorine, chloramine	Reduce pollutants	Reference
Bacter	O	O	X	X	O	Powder Beneficial bacteria
Remover	O	X	X	O	X	Remove chlorine, chloramine
Complex	O	O	X	O	O	Bacter + Remover
Accelerator	O	X	X	X	O	For appetite, spawning
Starter	O	O	O	X	O	During a month after setting
Booster Tropical	O	X	O	X	O	Maximizes existing bacteria

neoCAP
BACTER

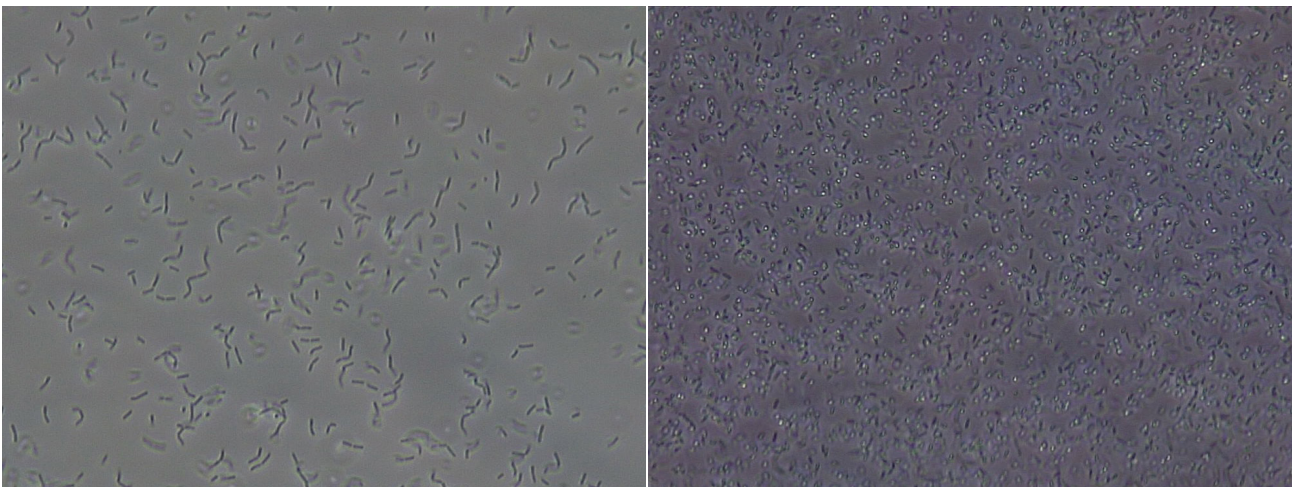

Neo Cap Bacter is a product that contains beneficial powder bacteria and their food, organic carbon.

Contain plenty of beneficial powder bacteria

When it is put into water, dormant beneficial bacteria act immediately,
This remove nitrogen compounds such as ammonia, ammonium and nitrite and various pollutants.

Recommended Usage

After removing the capsules, Add only the powder inside to the water
Use 1 capsule at 60 liters every 3 days

1bottle 20 capsules

Precautions

- ※ Don't eat it
- ※ Change the water when it becomes cloudy.
- ※ The color of the capsule may be changed.
- ※ Make sure to store the capsules in the original bottle with a safety lid
- ※ Use only for aquariums and be careful not to touch children and pets

neo CAP
REMOVER

Neo Cap Remover quickly neutralize chlorine, chloramine, heavy metals
Neo Cap Remover is a powder capsule type product of Neo V, a liquid water conditioner.

Contain plenty of Vitamin C

Vitamin C make fish healthier and more active.

Chlorine Neutralization Test

Recommended Usage

After removing the capsules, Add only the powder inside to the water
Use 1 capsule at 200 liters for each water change

1bottle 60 capsules

Precautions

- ※ Don't eat it
- ※ Change the water when it becomes cloudy.
- ※ The color of the capsule may be changed.
- ※ Make sure to store the capsules in the original bottle with a safety lid
- ※ Use only for aquariums and be careful not to touch children and pets

neoCAP
COMPLEX

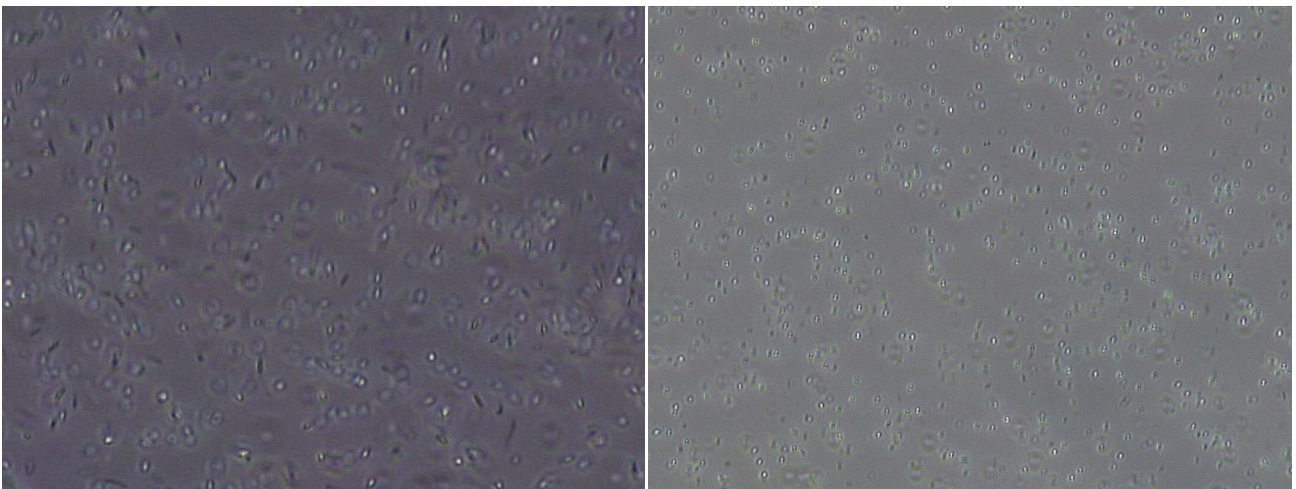

Neo Cap Complex is a mixture of chlorine neutralization and powdered bacteria.

Chlorine removal and bacterial injection at once

This product neutralizes chlorine chloramine heavy metals
When it is put into water, dormant bacteria act immediately and remove various pollutants.

Contain plenty of Vitamin C
Vitamin C make fish healthier and more active.

Chlorine Neutralization Test

Recommended Usage

After removing the capsules, Add only the powder inside to the water
Use 1 capsule at 200 liters for each water change

1bottle 30 capsules

Precautions

- ※ Don't eat it
- ※ Change the water when it becomes cloudy.
- ※ The color of the capsule may be changed.
- ※ Make sure to store the capsules in the original bottle with a safety lid
- ※ Use only for aquariums and be careful not to touch children and pets

neo CAP
ACCELERATOR

Neo Cap Accelerator promotes the appetite and spawning of fish.
The feed intake activity of fish or shrimp increases, and if mature, prepare for spawning.

Neo Cap Accelerator is a powder capsule type product of Neo V, a liquid water conditioner.

Contain natural amino acids and various nutrients

It is contained with natural amino acids and bacteria food, so bacteria activate immediately after injection and decompose pollutants.

Improve appetite and promote spawning

May 17th 2017: 50% water change and Neo v input
18th: spawning,
21th: hatching,
24th: body attachment

May 31th 2017: About 190 survived

Note) The success and rate of spawning may vary depending on the conditions and individuals of the aquarium.

Recommended Usage

After removing the capsules, Add only the powder inside to the water
Use 1 capsule at 60 liters every 3 days
Do an aeration with air-pump

1bottle 20 capsules

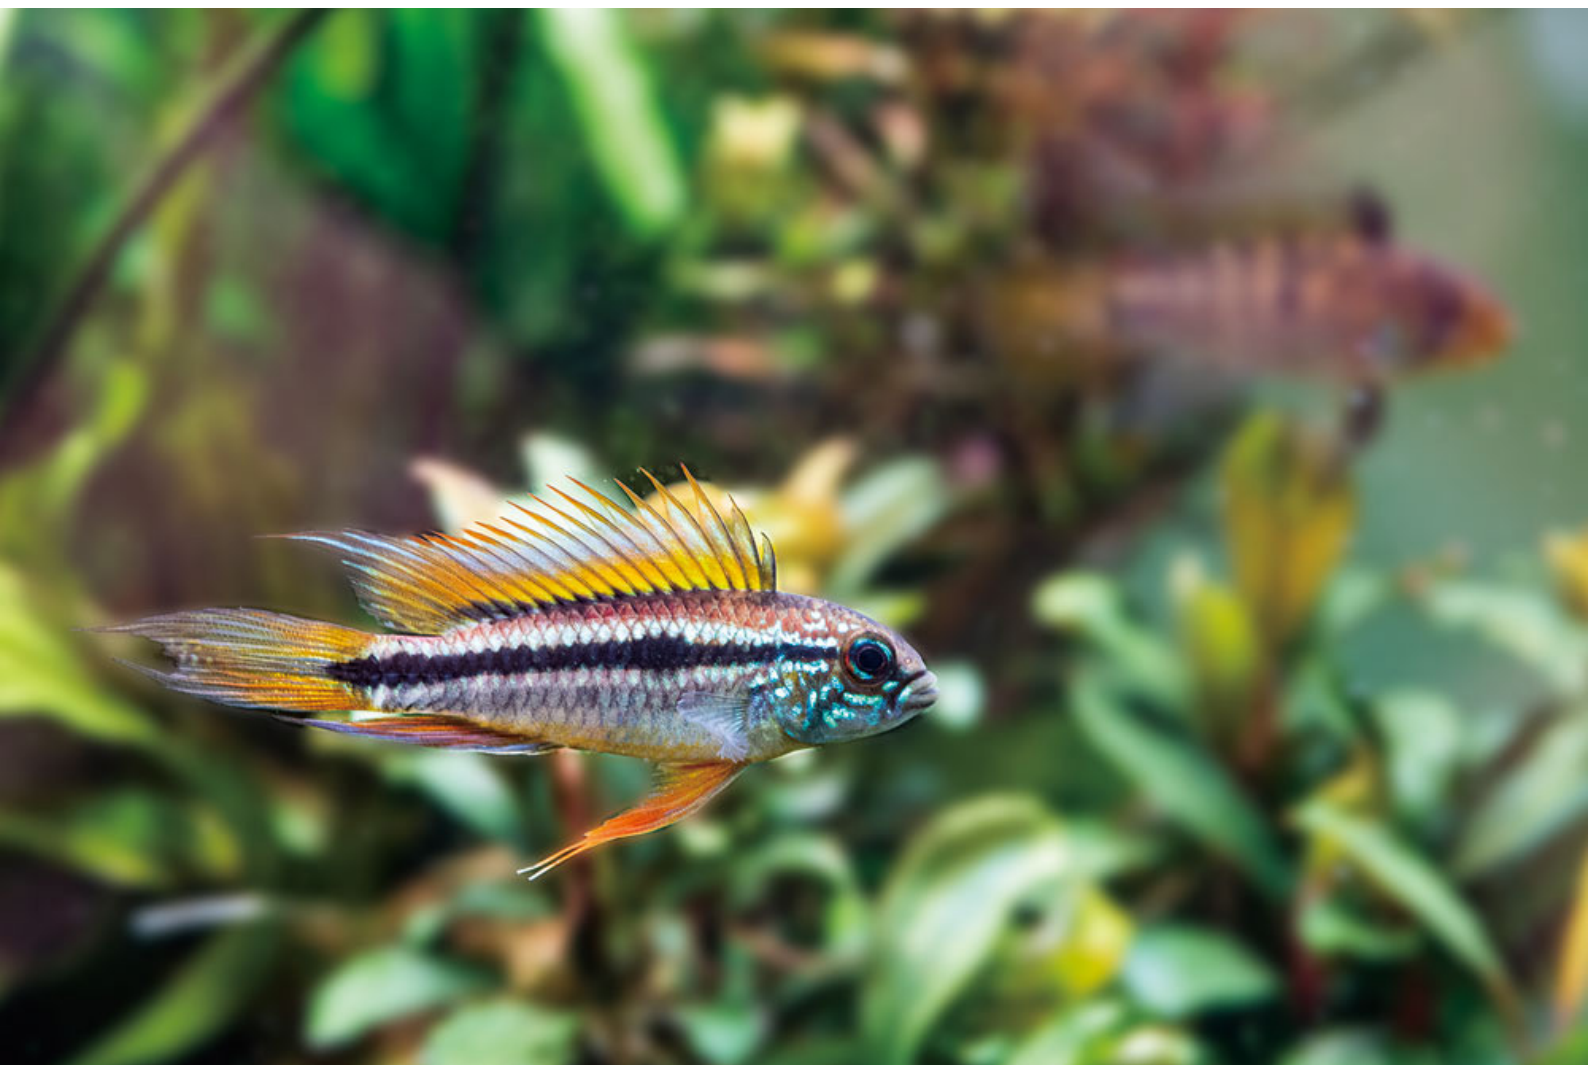

Precautions

- ※ Don't eat it
- ※ Change the water when it becomes cloudy.
- ※ Do not use with other bacterial products at the same time
- ※ The color of the capsule may be changed.
- ※ Make sure to store the capsules in the original bottle with a safety lid
- ※ Use only for aquariums and be careful not to touch children and pets

Neo Cap Booster Tropical maximizes the beneficial bacteria in the tank. It biologically decomposes various pollutants, ammonia, nitrite, and nitrate.

Neo Cap Booster Tropical is a powder capsule type product of Neo Booster Tropical, a liquid water conditioner.

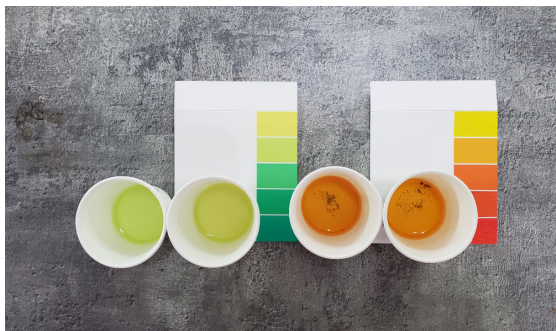

Contains all the nutritional sources of bacteria

In order for beneficial bacteria to survive and multiply, organic carbon, nitrogen, phosphate, and trace elemental sources such as vitamins are required. This is an all-in-one product that contains the most ideal percentage of all the nutrients that bacteria need.

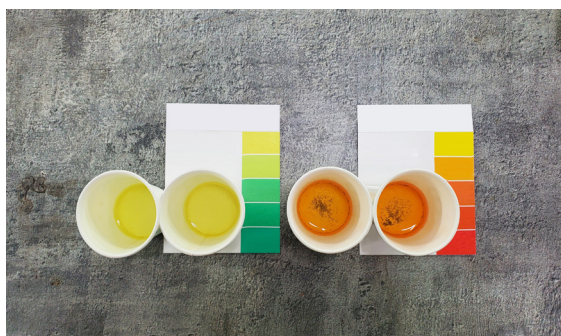

NH₂/NO₂ TEST

* The degree of ammonia and nitrate removal depends on the environment.

Dissolved oxygen

Recommended Usage

After removing the capsules, Add only the powder inside to the water
Use 1 capsule at 60 liters every 3 days
Do an aeration with air-pump

1bottle 20 capsules

Precautions

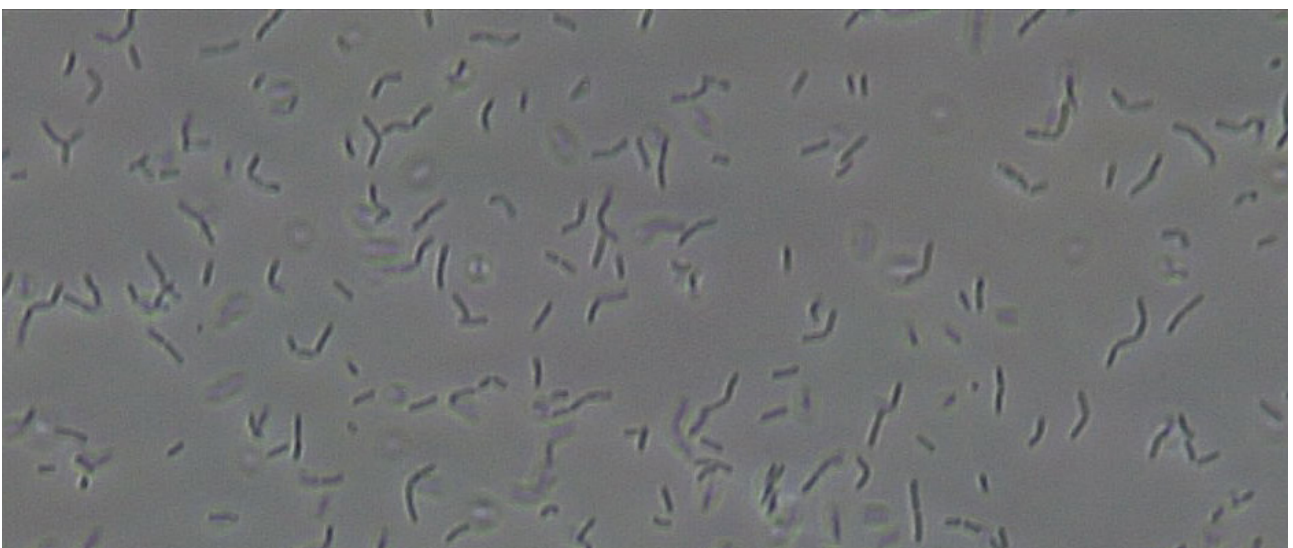

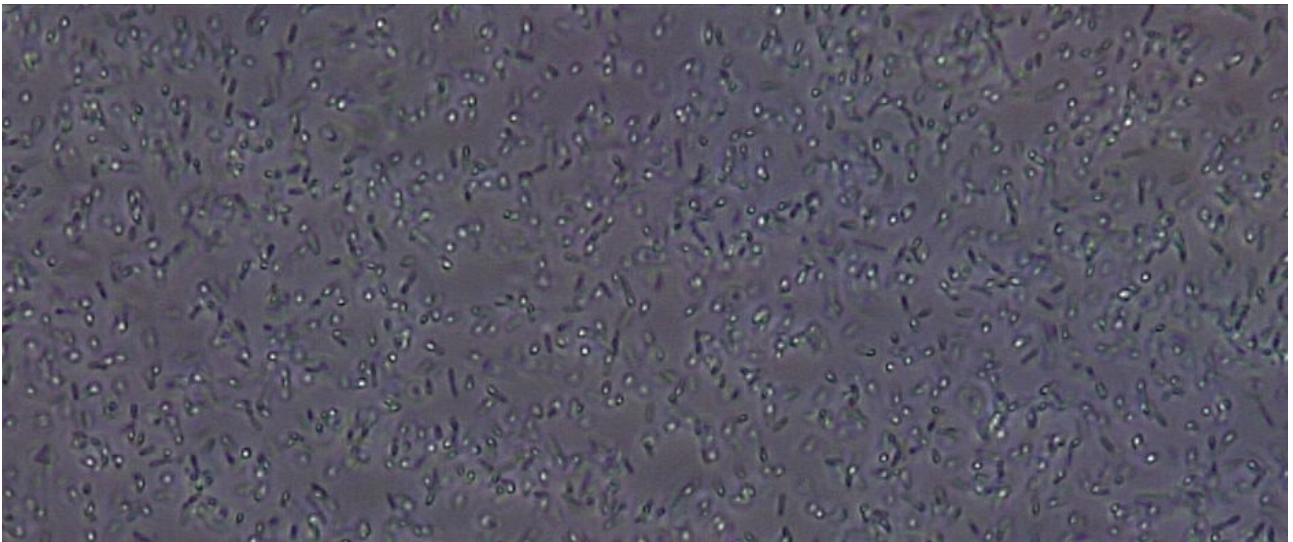

- ※ Don't eat it
- ※ Change the water when it becomes cloudy.
- ※ Do not use with other bacterial products at the same time
- ※ The color of the capsule may be changed.
- ※ Make sure to store the capsules in the original bottle with a safety lid
- ※ Use only for aquariums and be careful not to touch children and pets

neoCAP
STARTER

Neo Cap Starter contains beneficial powder bacteria and all the essential ingredients needed to reproduce, the bacteria

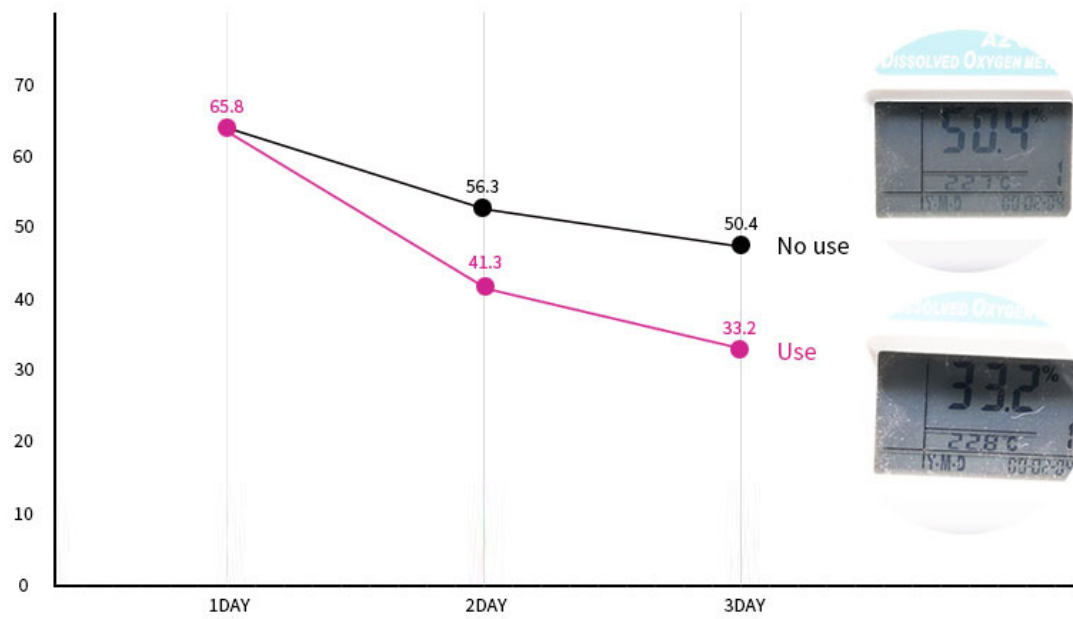

Ammonia, ammonium, nitrite occurs before the filtration cycle is completed and is dangerous for fish
This biologically remove nitrogen compounds such as ammonia, ammonium and various pollutants.
At first setting, Fish or shrimp can be put into the tank faster and safer than when not in use
